VOLUME 22 · 1981

AUTHOR INDEX

VOLUME 22 NUMBERS 1–8

A

Aberle, Elton D. See *Etherton et al.* 72

Abrams, Jeffrey J., and **Scott M. Grundy.** Cholesterol metabolism in hypothyroidism and hyperthyroidism in man 323

———, ———, and **Henry Ginsberg.** Metabolism of plasma triglycerides in hypothyroidism and hyperthyroidism in man 307

Adolphson, Janet L. See *Albers, Chen, and Adolphson* 1206

Ahlberg, Jon, Bo Angelin, and **Kurt Einarsson.** Hepatic 3-hydroxy-3-methylglutaryl coenzyme A reductase activity and biliary lipid composition in man: relation to cholesterol gallstone disease and effects of cholic acid and chenodeoxycholic acid treatment 410

Ahlberg, Jon, Tore Curstedt, Kurt Einarsson, and **Jan Sjövall.** Molecular species of biliary phosphatidylcholines in gallstone patients: the influence of treatment with cholic acid and chenodeoxycholic acid 404

Ahrens, E. H., Jr. See *Davidson et al.* 620

Alavi, M. See *Stange et al.* 47

Alber, Carol A. See *Mathur et al.* 659

Albers, John J., Ching Hong Chen, and **Janet L. Adolphson.** Lecithin:cholesterol acyltransferase (LCAT) mass: relationship to LCAT activity and cholesterol esterification rate 1206

———. See *Warnick et al.* 1015

Allen, C. Eugene. See *Etherton et al.* 72

Allevi, Pietro. See *Anastasia and Allevi* 370

Anastasia, Mario, and **Pietro Allevi.** Sterol synthesis: chemical synthesis of 3β-hydroxy-5α-cholest-7-ene-9α-carbonitrile 370

Andersen, John M. See *Turley, Andersen, and Dietschy* 551

Anderson, David W. See *Schaefer et al.* 217

Angelin, Bo. See *Ahlberg, Angelin, and Einarsson* 410

Arakawa, Kenzo. See *Kodama et al.* 1033

Arao, Y. See *Watanabe and Arao* 1020

Armstrong, Mark L. See *Mathur et al.* 659

Arner, Peter. See *Björkhem et al.* 1142

Ascoli, Mario. Effects of hypocholesterolemia and chronic hormonal stimulation on sterol and steroid metabolism in a Leydig cell tumor 1247

Attie, Alan D. See *Drevon et al.* 37

Avogaro, P. See *Bittolo Bon, Cazzolato, and Avogaro* 998

Ayengar, N. K. N. See *Bokkenheuser et al.* 95

B

Bachorik, Paul. See *Warnick et al.* 1015

Ballas, L. M. See *Bell, Ballas, and Coleman* 391

Barrnett, R. See *Janero and Barrnett* 1119

———. See *Janero and Barrnett* 1126

Barth, C. A., and **K. Wirthensohn.** Enzymatic determination of bile acids from liver cells with 3α-hydroxysteroid dehydrogenase—a warning 1025

Bartman, Candace. See *Sanghvi et al.* 720

Batta, Ashok K., Sarah Shefer, and **Gerald Salen.** Thin-layer chromatographic separation of conjugates of ursodeoxycholic acid from those of litho-, cheno-, deoxy-, and cholic acids 712

———. See *Shefer et al.* 532

Behr, Stephen R., Josef R. Patsch, Trude Forte, and **André Bensadoun.** Plasma lipoprotein changes resulting from immunologically blocked lipolysis 443

Behzadan, Shamideh. See *Nes et al.* 770

Belis, John A. See *Cenedella and Belis* 122

Bell, R. M., L. M. Ballas, and **R. A. Coleman.** Lipid topogenesis 391

Bensadoun, André. See *Behr et al.* 443

Berlan, Michel. See *Tran, Dang Tran, and Berlan* 1271

Berman, M. See *Foster and Berman* 506

———. See *Grundy et al.* 24

Bhat, Pangala V., Peter P. Roller, and **Luigi M. De Luca.** Chemical and biological studies on 5,6-epoxyretinol, retinol, and their phosphoryl esters 1069

Bhattacharya, Sharmila, and **Trevor G. Redgrave.** The content of apolipoprotein B in chylomicron particles 820

Bhattacharyya, Ashim K., and **Douglas A. Eggen.** Feedback regulation of cholesterol biosynthesis in rhesus monkeys with variable hypercholesterolemic response to dietary cholesterol 16

Billington, Timothy. See *Huff et al.* 1235

Bittolo Bon, G., G. Cazzolato, and **P. Avogaro.** Preparative isotachophoresis of human plasma high density lipoproteins HDL_2 and HDL_3 998

Björkhem, Ingemar, Peter Arner, Anders Thore, and **Jan Östman.** Sensitive kinetic bioluminescent assay of glycerol release from human fat cells 1142

———, **Helge Oftebro, Sverre Skrede,** and **Jan I. Pedersen.** Assay of intermediates in bile acid biosynthesis using isotope dilution–mass spectrometry: hepatic levels in the normal state and in cerebrotendinous xanthomatosis 191

———. See *Oftebro et al.* 632

———. See *Oftebro et al.* 1254

Bokkenheuser, V. D., J. Winter, P. B. Hylemon, N. K. N. Ayengar, and **E. H. Mosbach.** Dehydroxylation of 16α-hydroxyprogesterone by fecal flora of man and rat 95

Bösterling, Bernhard. See *Erickson and Bösterling* 872

Brash, Alan R. See *Goodman and Brash* 541

Brecher, Peter. See *Young and Brecher* 944

Breckinridge, Carl See *Warnick et al.* 1015

Brewer, H. Bryan, Jr. See *Schaefer et al.* 217

Bronzert, Thomas B. See *Schaefer et al.* 217

Bruckdorfer, K. Richard. See *Owen et al.* 423

Brunengraber, Henri, Shelley B. Weinstock, David L. Story, and **Ron R. Kopito.** Urinary clearance and metabolism of mevalonate by the isolated perfused rat kidney 916

VOLUME 22 · 1981

Cacciapuoti, A. F. See *White et al.* 891
Calabrese, Vincent P. See *DeVries et al.* 208
Carey, Martin C. See *Igimi and Carey* 254
Carlström, K., D. N. Kirk, and **J. Sjövall.** Microbial synthesis of 1β- and 15β-hydroxylated bile acids 1225
Carroll, Richard M., and **Larry L. Rudel.** Evaluation of a high-performance liquid chromatography method for isolation and quantitation of cholesterol and cholesteryl esters 359
Castle, Christine K. See *Krause et al.* 610
Cazzolato, G. See *Bittolo Bon, Cazzolato, and Avogaro* 998
Cenedella, Richard J., and **John A. Belis.** Studies on the source of urinary cholesterol in the normal human male 122
Chapman, M. John, Sonia Goldstein, Dominique Lagrange, and **P. Michel Laplaud.** A density gradient ultracentrifugal procedure for the isolation of the major lipoprotein classes from human serum 339
Chen, Ching Hong. See *Albers, Chen, and Adolphson* 1206
Cheng, Fenny W. See *Shefer et al.* 532
Chino, Haruo, and **Kyoko Kitazawa.** Diacylglycerol-carrying lipoprotein of hemolymph of the locust and some insects 1042
———, **Haruhito Katase, Roger G. H. Downer,** and **Koui Takahashi.** Diacylglycerol-carrying lipoprotein of hemolymph of the American cockroach: purification, characterization, and function 7
Chung, Byung H., Jere P. Segrest, John T. Cone, Janice Pfau, Jack C. Geer, and **Lois A. Duncan.** High resolution plasma lipoprotein cholesterol profiles by a rapid, high volume semi-automated method 1003
Chung, Chung Soo. See *Etherton and Chung* 1053
Coleman, R. A. See *Bell, Ballas, and Coleman* 391
Cone, John T. See *Chung et al.* 1003
Conner, Robert L. See *Nes et al.* 770
Connor, William E. See *Douglass, Connor, and Lin* 961
Cornwell, David G. See *Gavino et al.* 57
———. See *Gavino et al.* 763
Coudron, Thomas A., and **Dennis R. Nelson.** Characterization and distribution of the hydrocarbons found in diapausing pupae tissues of the tobacco hornworm, *Manduca sexta* (L.) 103
Cox, Jeffery W., and **Lloyd A. Horrocks.** Preparation of thioester substrates and development of continuous spectrophotometric assays for phospholipase A_1 and monoacylglycerol lipase 496
Craig, Iain F., David P. Via, William W. Mantulin, Henry J. Pownall, Antonio M. Gotto, Jr., and **Louis C. Smith** Low density lipoproteins reconstituted with steroids containing the nitrobenzoxadiazole fluorophore 687
Crotte, C. See *Reynier et al.* 467
Crouse, John R. See *Davidson et al.* 620
Curstedt, Tore. See *Ahlberg et al.* 404

D

D'Angona, Jay L. See *Klock, D'Angona, and Macher* 1079
Dang Tran, Lac. See *Tran, Dang Tran, and Berlan* 1271
Davidson, Nicholas O., Paul Samuel, Sidney Lieberman, Susan P. Shane, John R. Crouse, and **E. H. Ahrens, Jr.** Measurement of bile acid production in hyperlipidemic man: does phenotype or methodology make the difference? 620
Dax, Elizabeth M., John S. Partilla, and **Robert I. Gregerman.** Mechanism of the age-related decrease of epinephrine-stimulated lipolysis in isolated rat adipocytes: β-adrenergic receptor binding, adenylate cyclase activity, and cyclic AMP accumulation 934
Day, Richard C. See *Owen et al.* 423
de la Llera, Margarita, Jane M. Glick, and **George Rothblat.** Mechanism of triglyceride accumulation in rat preadipocyte cultures exposed to very low density lipoprotein 245
DeLamatre, John G., and **Paul S. Roheim.** Effect of cholesterol feeding on apo B and apo E concentration and distribution in euthyroid and hypothyroid rats 297
Dell, Ralph B. See *Ramakrishnan, Dell, and Goodman* 1174
De Luca, Luigi M. See *Bhat, Roller, and De Luca* 1069
DeMark, Bruce R., and **Peter D. Klein.** Ammonia gas: an improved reagent for chemical ionization mass spectrometry of bile acid methyl ester acetates 166
DeVries, George H., Walter J. Zetusky, Catherine Zmachinski, and **Vincent P. Calabrese.** Lipid composition of axolemma-enriched fractions from human brains 208
Dietschy, John M. See *Turley, Andersen, and Dietschy* 551
Dillman, John M. See *Gavino et al.* 57
Ditschuneit, H. See *Stange et al.* 47
Dolphin, Peter J. Serum and hepatic nascent lipoproteins in normal and hypercholesterolemic rats 971
Dory, Ladislav, and **Paul S. Roheim.** Rat plasma lipoproteins and apolipoproteins in experimental hypothyroidism 287
———. See *Tam, Dory, and Rubinstein* 641
Douglass, T. Scott, William E. Connor, and **Don S. Lin.** The biosynthesis, absorption, and origin of cholesterol and plant sterols in the Florida land crab 961
Downer, Roger G. H. See *Chino et al.* 7
Drevon, Christian A., Alan D. Attie, Sharon H. Pangburn, and **Daniel Steinberg.** Metabolism of homologous and heterologous lipoproteins by cultured rat and human skin fibroblasts 37
Dubois, M. See *Pageaux et al.* 725
Duncan, Lois A. See *Chung et al.* 1003
Duperray, B. See *Pageaux et al.* 725

E

Edenharder, R., and **T. Knaflic.** Epimerization of chenodeoxycholic acid to ursodeoxycholic acid by human intestinal lecithinase-lipase-negative *Clostridia* 652
Edwards, Peter A. See *Fogelman et al.* 1131
———. See *Shechter et al.* 63
Eggen, Douglas A. See *Bhattacharyya and Eggen* 16
Einarsson, Kurt. See *Ahlberg et al.* 404
———. See *Ahlberg, Angelin, and Einarsson* 410
Emken, E. A. See *Ohlrogge, Emken, and Gulley* 955
Emond, Diane. See *Marcel et al.* 1198
Erickson, Sandra K., and **Bernhard Bösterling.** Cholesterol 7α-hydroxylase from human liver: partial purification and reconstitution into defined phospholipid-cholesterol vesicles 872

Etherton, Terry D., Elton D. Aberle, E. H. Thompson, and **C. Eugene Allen.** Effects of cell size and animal age on glucose metabolism in pig adipose tissue 72
———, and **Chung Soo Chung.** Preparation, characterization, and insulin sensitivity of isolated swine adipocytes: comparison with adipose tissue slices 1053
Evangelatos, Gregory P. See *Radin and Evangelatos* 536

F

Fairclough, Gordon F., Jr. See *Gilder et al.* 1277
Fallani, Anna. See *Tombaccini et al.* 590
Fasella, Paolo. See *Passi et al.* 778
Feingold, Kenneth R., Millie Hughes Wiley, Gordon MacRae, and **Marvin D. Siperstein.** The effect of decreased plasma cholesterol concentration on circulating mevalonate metabolism in rats 990
Fernando-Warnakulasuriya, Germain J. P., Joan E. Staggers, Susan C. Frost, and **Michael A. Wells.** Studies on fat digestion, absorption, and transport in the suckling rat. I. Fatty acid composition and concentrations of major lipid components 668
———. See *Staggers, Fernando-Warnakulasuriya, and Wells* 675
Fidge, Noel H., and **Peter J. McCullagh.** Studies on the apoproteins of rat lymph chylomicrons: characterization and metabolism of a new chylomicron-associated apoprotein 138
———. See *Huff et al.* 1235
Fitzharris, Thomas J., Dan M. Quinn, Edward H. Goh, J. David Johnson, Moti L. Kashyap, Laxmi S. Srivastava, Richard L. Jackson, and **Judith A. K. Harmony.** Hydrolysis of guinea pig nascent very low density lipoproteins catalyzed by lipoprotein lipase: activation by human apolipoprotein C-II 921
Fogelman, Alan M., Margaret E. Haberland, Janet Seager, Martha Hokom, and **Peter A. Edwards.** Factors regulating the activities of the low density lipoprotein receptor and the scavenger receptor on human monocyte-macrophages 1131
———. See *Shechter et al.* 63
Forrest, Thomas P. See *Macdonald, Hutchison, and Forrest* 458
Forte, Trude. See *Behr et al.* 443
———. See *Shen et al.* 236
Foster, D. M., and **M. Berman.** Hydrolysis of rat chylomicron acylglycerols: a kinetic model 506
Fricke, R. J. See *White et al.* 891
Fried, Susan K., Marcelle Lavau, and **F. Xavier Pi-Sunyer.** Role of fatty acid synthesis in the control of insulin-stimulated glucose utilization by rat adipocytes 753
Frost, Susan C. See *Fernando-Warnakulasuriya et al.* 668

G

Galli, Giovanni. See *Sanghvi et al.* 720
Galli Kienle, Marzia. See *Sanghvi et al.* 720
Garcia, Carmalita. See *Warnick et al.* 1015
Garti, N., L. Karpuj, and **S. Sarig.** Correlation between crystal habit and the composition of solvated and non-solvated cholesterol crystals 785
Gartside, P. S. See *Kashyap et al.* 800
Gavino, Victor C., James S. Miller, John M. Dillman, George E. Milo, and **David G. Cornwell.** Polyunsaturated fatty acid accumulation in the lipids of cultured fibroblasts and smooth muscle cells 57
———, **James S. Miller, Samuel O. Ikharebha, George E. Milo,** and **David G. Cornwell.** Effect of polyunsaturated fatty acids and antioxidants on lipid peroxidation in tissue cultures 763
Gebhard, Roger L., and **William F. Prigge.** In vivo regulation of canine intestinal 3-hydroxy-3-methylglutaryl coenzyme A reductase by cholesterol, lipoprotein, and fatty acids 1111
Geer, Jack C. See *Chung et al.* 1003
Gerolami, A. See *Reynier et al.* 467
Ghidoni, Riccardo, Sandro Sonnino, Massimo Masserini, Paolo Orlando, and **Guido Tettamanti.** Specific tritium labeling of gangliosides at the 3-position of sphingosines 1286
Ghoos, Y. See *Vantrappen, Rutgeerts, and Ghoos* 528
Gilder, Helena, Rudy H. Haschemeyer, Gordon F. Fairclough, Jr., and **Dennis C. Mynarcik.** Isolation and characterization of lamellar body material from rat lung homogenates by continuous linear sucrose gradients 1277
Ginsberg, Henry. See *Abrams, Grundy, and Ginsberg* 307
Glick, Jane M. See *de la Llera, Glick, and Rothblat* 245
Glickman, Robert M. See *Green and Glickman* 1153
Glueck, Charles J. See *Taskinen et al.* 382
Goh, Edward H. See *Fitzharris et al.* 921
Gol'danskii, V. I., A. I. Mikhailov, V. G. Omel'yanenko, V. N. Smirnov, and **V. P. Torchilin.** Free radical label: new approach to the study of super-slow molecular dynamics of lipid systems 131
Goldstein, Sonia. See *Chapman et al.* 339
Gollan, John L. See *Kushlan et al.* 431
Goodman, DeWitt S. See *Ramakrishnan, Dell, and Goodman* 1174
Goodman, Robert P., and **Alan R. Brash.** Measurement of 5,8,11,14-eicosatetraynoic acid in plasma by gas–liquid chromatography 541

SUBJECT INDEX

VOLUME 22 NUMBERS 1–8

A

Absolute configuration
Of trihydroxycholanoic acids 1181
Absorption
Of cholesterol, effects of bile acids 467
Of cholesterol in the rat, effect of pancreatic diversion 157
Of cholesterol, suppression by lecithin 744
Of fat, in the golden hamster, in vitro studies 147
Of fat, in the suckling rat 668, 675
Intestinal, of fat (review) 1153
Of lipids, in teleostean fishes 81
Of micellar solutions of tocopherol and tocopheryl acetate in the rat 829
ACAT: *see* **Acyl-CoA: cholesterol acyltransferase**
Acetyl CoA carboxylase: Rat liver, isolation of 364
Acid hydrolases: Biliary output 229
Acyl CoA:cholesterol acyltransferase
Activity in cultured fibroblasts, regulation by lipoproteins 37
Activity, in diet-induced hypercholesterolemia in cynomolgus monkeys 659
In human small intestine, activity and properties 271
Acyl CoA hydrolase: Activity, in human small intestine 271
Acylglycerols: Of rat chylomicrons, kinetics of hydrolysis of by LPL 506
Adenylate cyclase
Activity in adipocytes from young, mature, and old rats 934
Stimulation in human fat cells by epinephrine 113
Adipocytes
α-Adrenergic responses, influence of cell size 1084
Bioluminescent assay of release of glycerol from 1142
Bovine, hyperplasia and hypertrophy 452
Fatty acid synthesis, role of in control of insulin-stimulated glucose utilization 753
Human, inhibition of β-adrenergic response by α-adrenergic agonists 1265
Lipolysis in, epinephrine-stimulated 934
Plasma membrane, changes in response to nutrition 1094
Size, effect of on glucose metabolism 72
Swine, glucose oxidation and lipogenesis 1053
Volume, relationship to amount of plasma membrane 1094
Adipose tissue
Bone, release of FFA from 1271
Cellularity, bovine, developmental changes 452
Pig, glucose metabolism, effects of cell size and animal age 72
β-Adrenergic binding: In adipocytes from young, mature, and old rats 934
α-Adrenergic response: Of rabbit adipocytes, effect of cell size 1084
African green monkeys: Effect of dietary fat and cholesterol on plasma lipids and HDL cholesterol 278
Agonists, α-adrenergic: Antilipolytic action in human adipocytes 1265
Albumin: Effect of on triglyceride accumulation by preadipocytes 245
Algae
Green, glycolipids of 1126
Green, phospholipids of 1119
4-Aminopyrazolo(3,4-d)pyrimidine
Effect on cholesterol metabolism in a Leydig tumor cell 1247
Effect of mevalonate metabolism in the rat 990
Effect on steroid biosynthesis in a Leydig tumor cell 1247
Production of hypolipemia by, in rats 990
Antioxidants: Effect of on lipid peroxidation, in tissue cultures 763
Apolipoproteins
A-I, a new apoprotein associated with rat lymph chylomicrons, characterization and metabolism 138
A-I and A-II, altered metabolism in Tangier homozygotes 217
A-I, A-II, and D in subfractions of HDL 1102
A-I/A-II ratios, in subfractions of HDL_2 and HDL_3 998
A-I, E, A-IV, and A-V, distribution in rat serum HDL and lymph VLDL 138
A-IV, increased lymphatic output during lipid absorption in the rat 610
Analysis by SDS-gel filtration chromatography 514
B, C, and E, in triglyceride-rich lipoproteins, metabolism in the rat 519
B, effect on, of cholesterol feeding in hypothyroid rats 297
B, and E, in isolated nascent and serum lipoproteins 971
B, mass, per chylomicron particle in rat lymph 820
B, measurement of by SDS polyacrylamide gel electrophoresis 820
B, metabolic heterogeneity in the rat 519
B, in rat lymph chylomicrons 820
B, resolution of two forms by SDS-gel filtration chromatography 514
C-II, activation of lipoprotein lipase by 921
C-II, fate of during lipolysis of VLDL in vitro 641
C-III, concentration in hypertriglyceridemia 800
C-III, fate of during lipolysis of VLDL in vitro 641
C-III and subspecies, quantitation by radioimmunoassay and isoelectric focusing 800
In chylomicrons and intestinal VLDL 1153
E, effect on, of cholesterol feeding in hypothyroid rats 297
E, fate of during lipolysis of VLDL in vitro 641
E, role of in transfer and equilibration of cholesteryl esters 1198
Of LDL and HDL, interaction with isolated rabbit hepatocytes 1214
Mesenteric lymph, in ethinyl estradiol-treated rats 610
Of rat lymph chylomicrons 138
Rat plasma, in experimental hypothyroidism 287
In serum, hepatic Golgi cisternae, and secretory vesicle lipoproteins from hypercholesterolemic rats 971
4-APP: *see* **4-Aminopyrazolo(3,4-d)pyrimidine**
Arachidonic acid: In platelet phospholipids 423

Archaeology: Use of HPLC in analysis of lipids in archaeological samples 778
Atherogenesis: Role of LDL 236
Atherogenic diet: Effect on liver ACAT activity in cynomolgus monkeys 659
ATP: Reversible inactivation of cholesterol 7α-hydroxylase by 580

B

Bile
Choline-containing phospholipids in enzymatic measurement of 373
Phosphatidylcholine molecular species, in gallstone patients, influence of treatment with bile acids 404
Bile acids
Conjugated, separation by TLC 712
Effect on micellar solubilization and intestinal absorption of cholesterol 467
Epimerization of 7-hydroxy group by intestinal flora 1060
1β- and 15β-Hydroxylated, microbial synthesis of 1225
7β-Hydroxy and 7-keto, formation from primary 7α-hydroxy bile acids by *C. absonum* 458
Intermediates, HPLC of 191
Intermediates in biosynthesis of, assay by isotope dilution–MS 191
Intermediates in biosynthesis of, in CTX 191
From liver cells, enzymatic determination with 3α-hydroxysteroid dehydrogenase 1025
Metabolism, in hypo- and hyperthyroidism in man 323
Metabolism of, effect of bile duct ligation in rats 201
Methyl ester acetates, chemical ionization mass spectrometry of 166
Production in hyperlipidemic subjects 620
Production, measurement of, comparison of methodologies 620
Serum isotope derivative assay of 725
Serum, separation of sulfated from non-sulfated 705
Sulfated and non-sulfated, TLC, and GLC of 705
Synthesis in the rat, acceleration by bile duct ligation 201
Synthesis, regulation of 532, 872
Treatment of gallstone disease, effect on hepatic HMG CoA reductase and biliary lipid composition 410
Treatment of gallstone patients with, effect on phosphatidylcholine molecular species 404
Turnover and pool size, measurement 528
Bile flow: Cellular mechanisms 229
Biliary lipid
Composition, relation to cholesterol gallstone disease and treatment with bile acids 410
Secretion, cellular mechanisms 229
Biliary obstruction: Metabolism of bile acids in 201
Bioluminescence: Assay of glycerol release from human adipocytes by 1142
7,22-Bisdehydrodesmosterol: Formation from dehydrogenation of desmosterol by *Tetrahymena pyriformis* 770
7,22-Bisdehydrohalosterol: Formation from dehydrogenation of halosterol by *Tetrahymena pyriformis* 770
26,27-Bisnorcampesterol: *see* **Halosterol**
26,27-Bisnorcholesterol: Dehydrogenation by *Tetrahymena pyriformis* 770
Bone marrow: Adipose tissue, release of FFA from 1271
Brain: Human, lipid composition of axolemma-enriched fractions of 208
(20*R*)-*n*-Butylpregn-5-en-3β-ol: *see* 26,27-Bisnorcholesterol

C

Campesterol: Dehydrogenation by *Tetrahymena pyriformis* 770
Catecholamines: Effect of on release of FFA from bone marrow adipose tissue 1271
Cell culture: Of human monocytes 1131
Cell proliferation Control by lipid peroxidation 763
Role of retinoid-binding proteins 899
Ceramide: And sphingomyelin, separation of molecular species, by HPLC 714
***Cercopithecus aethiops*:** Effect of dietary fat and cholesterol on plasma lipids and HDL cholesterol 278
Cerebroside: Labeling of with borotritide using galactose oxidase 536
Cerebrotendinous xanthomatosis
Bile acid biosynthesis 191
Defective hydroxylation of chenodeoxycholic acid precursors 632
Chemical composition
Of rat lymph chylomicrons 820
Of subfractions of HDL_2 and HDL_3 separated by isotachophoresis 998
Chenodeoxycholic acid
Conversion to ursodeoxycholic acid by intestinal microflora 1060
7α-Dehydroxylation of by cell extracts of *Eubacterium* species 891
Effect of micellar solubilization and intestinal absorption of cholesterol 467
Epimerization to ursodeoxycholic acid, by human intestinal *Clostridia* 652
And glycine and taurine conjugates, dissolution of cholesterol gallstones by 254
Precursors, defective hydroxylation in CTX 632
In synthesis of (22*R* and 22*S*)-3α,7α,22-trihydroxy-5β-cholan-24-oic acids 1181
Treatment of gallstone patients with, effect of on biliary phosphatidylcholine 404
In vitro transformation by human intestinal flora 735
***Chlamydomonas reinhardtii* 137$^+$** Glycolipids of 1119
Phospholipids of 1126
Chloroquine: Effect of, on degradation of LDL by monocyte-macrophages 63
Cholesta-5,25-dien-3β-ol: *see* **Desmosterol**
5β-Cholestane-3α-7α-diol: Oxidation of side chain, in CTX 632
Cholestasis: Experimental, bile flow, biliary lipid secretion, and lysosomal enzyme output 229
Cholesta-5,22-*trans*,24-trien-3β-ol: *see* **22-*trans*-Dehydrodesmosterol**
5-Cholestene-3β,7α-diol: Oxidation of side chain, in CTX 632
Cholest-5-en-3β-ol: *see* **Cholesterol**
Cholesterol
Absorption in hypo- and hyperthyroidism in man 323
Absorption, in the rat, during pancreatic diversion 157
Absorption, in rhesus monkeys 16

Absorption, role of ACAT 271
Absorption, suppression by lecithin 744
Anhydrous and monohydrate, in gallstones 254
Anhydrous and monohydrate, X-ray diffraction patterns and crystal habits 254
Biliary, excretion 467
Biosynthesis, absorption, and origin in the Florida land crab 961
Biosynthesis, feedback regulation in rhesus monkeys 16
Crystals, crystal habit and composition 785
Dehydrogenation by *Tetrahymena pyriformis* 770
Dietary, effect on HMG CoA activity in swine liver and ileum 811
In DMPC liposomes, effect on molecular motion of lipids 131
Esterification, in human small intestine by ACAT 271
Esterification, rate of, relationship to LCAT mass 1206
Feeding, effect on apoB and apoE in euthyroid and hypothyroid rats 297
Gallstones, dissolution in bile by cheno- and ursodeoxycholate and their conjugates 254
In HDL, effect of diet on concentration, in African green monkeys 278
In HDL, quantification in turbid heparin-Mn^{2+} supernates 1015
Hepatic, concentration in gallstone disease 410
Intestinal absorption, effects of bile acids 467
Isolation and quantitation by HPLC 359
Of LDL and HDL, interaction with isolated rabbit hepatocytes 1214
Metabolism in canine intestinal epithelial cells 1111
Metabolism in a functional Leydig cell tumor 1247
Metabolism, in hypo- and hyperthyroidism in man 323
Metabolism in man, effect of nicotinic acid 24
Micellar solubilization, effects of bile acids 467
Profiles in lipoproteins separated by vertical spin ultracentrifugation 1003
Plasma, decreased, effect on mevalonate metabolism in rats 990
Rates of synthesis and uptake in the major organs of the rat in vivo 551
Saturation of bile, in gallstone disease 410
Side-pool synthesis in humans, models of 1174
Synthesis in experimental xanthoma tissues 1033
Synthesis, by the perfused rat kidney 916
Urinary, source of in the normal human male 122

Cholesterol balance: In hypo- and hyperthyroidism in man 323

Cholesterol gallstone disease: Effect of bile acid treatment, on hepatic HMG CoA reductase and biliary lipids 410

Cholesteryl esters
Formation, by liver ACAT, in hypercholesterolemic cynomolgus monkeys 659
Isolation and quantitation by HPLC 359
Synthesis in experimental xanthoma tissues 1033
Transfer from phospholipid vesicles to human HDL 944
Unidirectional transport from phospholipid vesicles to HDL 944

Cholesteryl ester hydrolase: Synthetic activity, in rat mucosal homogenates 157

Cholesteryl ester transfer protein
In transfer of cholesteryl ester to HDL from phospholipid vesicles 944
Transfer of cholesteryl ester from HDL to VLDL 1198

Cholesteryl oleate: Micellar solution, use of in pancreatic esterase activity measurement 177

Cholestyramine
Effect on cholesterol 7α-hydroxylase activity 570
Effect on HMG CoA reductase activity in swine liver 811

Cholic acid
7α-Dehydroxylation of by cell extracts of *Eubacterium* species 891
Effect on micellar solubilization and intestinal absorption of cholesterol 467
Treatment of gallstone patients with, effect of on biliary phosphatidylcholine 404

Choline oxidase: Use of in measurement of choline-containing phospholipids in bile 373

Choriogonadotropin
Effect on cholesterol metabolism in a Leydig tumor cell 1247
Effect on steroid biosynthesis in a Leydig tumor cell 1247

Chromatography, affinity: Heparin-Sepharose, subfractionation of human HDL 1198

Chromatography, column: Of acidic phospholipids on immobilized neomycin 1296

Chromatography, gas–liquid
Assay of FFA by 1
Capillary, determination of FFA in plasma by 852
Identification of neutral steroids in human and rat feces 474
And mass spectrometry of bile acid methyl ester acetates 166
And mass spectrometry of chenodeoxycholate metabolites from human intestinal *Clostridia* 652
And mass spectrometry of hydrocarbons of tobacco hornworm pupae 103
And mass spectrometry, of hydroxylated metabolites of bile acids 1225
And mass spectrometry, use of in measuring cholesterol 7α-hydroxylase activity 720
Measurement of 5,8,11,14-eicosatetraynoic acid in plasma 541
Of sulfated and non-sulfated bile acids 705

Chromatography, gel filtration: SDS, of apolipoproteins 514

Chromatography, high performance liquid
Analysis of lipids in archaeological samples 778
Argentation, reversed phase, separation of molecular species of sphingomyelin and ceramide 714
Of bile acid intermediates 191
Isolation and quantitation of cholesterol and cholesteryl esters 359
Of neutral glycosphingolipids 1020
Reversed phase, of phosphatidylcholine 697
Reversed phase, separation of molecular species of sphingomyelin and ceramide 714

Chromatography, high pressure liquid
Of metabolites of bile acid precursors 632
Of 17α- and 17β-pregnanolones 95
Of retinoids 1069

Chromatography, ion-exchange
Of HMG-CoA 184
Subfractionation of HDL by 1102

Chromatography, medium pressure liquid: Of lipids from baker's yeast 171
Chromatography, thin-layer
Of conjugates of urso-, litho, chenodeoxy-, deoxy-, and cholic acids 712
Identification of neutral steroids in human and rat feces 474
Of neutral glycolipids 1079
Of neutral glycosphingolipids 1020
Of sulfated and non-sulfated bile acids 705
Chylomicrons Clearance, in hypo- and hyperthyroidism in man 307
Formation and metabolism (review) 1153
Formation by sacs of everted hamster intestine 147
Metabolism, during dietary-induced hypercholesterolemia in dogs 598
Rat, kinetic model for hydrolysis of acylglycerols of by LPL 506
Rat lymph, apoB in 820
Rat lymph, apolipoproteins of 138
Rat lymph, chemical composition 820
Turnover in control and hypercholesterolemic dogs 598
Circadian variation: Of HMG CoA reductase activity in swine liver and ileum 811
Clofibrate: Lack of effect on HMG CoA reductase activity in swine liver and ileum 811
***Clostridia*:** Human intestinal, epimerization of chenodeoxycholic acid to ursodeoxycholic acid by 652
***Clostridium absonum*:** Formation of urso- and ursodeoxycholic acids from primary bile acids 458
Cockroach: American, diacylglycerol-carrying lipoprotein in hemolymph 7
CTX: *See* **Cerebrotendinous xanthomatosis**
Cultured cells: Lipid composition 590
Cyclic AMP: Accumulation in adipocytes from young, mature, and old rats 934
Cynomolgus monkeys: Hypercholesterolemic, ACAT activity in 659
Cytochrome P-450
Enzyme system, human liver metochondria, side chain hydroxylation of C_{27}-steroids and vitamin D_3 1254
Human liver, partial purification and constitution into phospholipid-cholesterol vesicles 872

D

7-Dehydrocampesterol: Formation from dehydrogenation of camposterol by *Tetrahymena pyriformis* 770
24-Dehydrocholesterol: *see* **Desmosterol**
22-Dehydrodesmosterol
Dehydrogenation by *Tetrahymena pyriformis* 770
Formation from dehydrogenation of desmosterol by *Tetrahymena pyriformis* 770
7-Dehydrohalosterol: Formation from dehydrogenation of halosterol by *Tetrahymena pyriformis* 770
7α-Dehydroxylase
Of *Eubacterium* sp., induction by cholic acid 891
Of *Eubacterium* sp. V.P.I. 12708, cofactors 891
16α-Dehydroxylase: Activity in fecal flora 95
Dehydroxylation: Of 16α-hydroxyprogesterone by fecal flora of man and rats 95
Desmosterol
Accumulation in rhesus monkeys fed triparanol and cholesterol 16
Dehydrogenation by *Tetrahymena pyriformis* 770
DGPL: *see* **Diacylglycerol-carrying lipoprotein**
Diacylglycerol: Transport in hemolymph of the American cockroach 7
Diacylglycerol-carrying lipoprotein
Of hemolymph of the American cockroach 7
In hemolymph of the locust and insects 1042
Purification, characterization, and function 7
Diarachidonyl phospholipids: Effect of on lipid peroxidation in liver microsomes 905
Diazotized diiodosulfanilic acid: Use of in measuring the quantity of adipocyte plasma membrane 1094
Dietary cholesterol
Effect on plasma lipid and HDL cholesterol concentration, in African green monkeys 278
Influence on intestinal and liver HMG CoA reductase activity 47
Variable hypercholesterolemic response in rhesus monkeys 16
Dietary fat
Effect on plasma lipid and HDL cholesterol concentration, in African green monkeys 278
Saturation, effect on lipid peroxidation in rat liver microsomes 905
Saturation, influence on intestinal and liver HMG CoA reductase activity 47
Dietary lipid: Effect on hepatic sterol synthesis in the Mongolian gerbil 792
Dietary sterols: In the Florida land crab 961
Differential scanning calorimetry Of cholesterol 785
Of VLDL from the isolated perfused rat liver 838
Differential thermal analysis: Of cholesterol crystals 785
Digestion: Of fat, in the suckling rat 668, 675
24,25-Dihydrolanosterol: Synthesis of 32-oxygenated derivatives 859
Dimethoxypropane: Methylation of FFA with, in GLC assay of FFA 852
(20*R*)-24,24-Dimethylchola-5,7-dien-3β-ol: *see* **7-Dehydrohalosterol**
(20*R*)-24,24-Dimethylchola-5,7,22-*trans*-trien-3β-ol: *see* **7,22-Bisdehydrohalosterol**
(20*R*)-24,24-Dimethylchol-5-en-3β-ol: *see* **Halosterol**
(20*S*)-24,24-Dimethylchol-5-en-3β-ol: *see* **20-Isohalosterol**
Dimyristoyl phosphatidycholine: Liposomes, study of by EPR-spectroscopy 131
Diurnal variation: Of hepatic sterol synthesis in Mongolian gerbil 792
DMPC: *see* **Dimyristoyl phosphatidylcholine**

E

5,8,11,14-Eicosatetraynoic acid: In plasma, measurement of by GLC 541
Electroimmunoassay: Of lymph VLDL apoproteins 138
Electron microscopy
Of hamster jejunum, during secretory phase of fat absorption 147
Of hepatic Golgi cisternal fractions from hypercholesterolemic rats 971
Of human LDL subfractions 236
Of human serum lipoproteins 339

Of lamellar body material isolated from rat lung 1277
Of rainbow trout intestinal epithelial cells during lipid absorption 81
Of rat lymph chylomicrons 820
Of VLDL 921
Electron paramagnetic resonance: Spectra, of DMPC liposomes 131
Electrophoresis: SDS polyacrylamide gel, measurement of apoB by 820
Enzyme assay: Of choline-containing phospholipids in bile 373
Enzymes: Of glycerolipid biosynthesis 391
24-Epiergosterol: Formation from dehydrogenation of campesterol by *Tetrahymena pyriformis* 770
Epimerization
Of chenodeoxycholic and ursodeoxycholic acids by human intestinal flora 735
Of 7-hydroxy group of bile acids by intestinal microflora 1060
Epinephrine
Effect of on release of FFA from bone marrow adipose tissue 1271
Responsiveness of rabbit adipocytes, effect of cell size 1084
Stimulation of fat cell adenylate cyclase, role of GTP 113
Stimulation of lipolysis by, in isolated adipocytes 934
5,6-Epoxyretinol
Metabolism by cultured mouse fibroblasts (3T12 cells) 1069
And phosphoryl esters, chemical and biological 1069
EPR: *see* **Electron paramagnetic resonance**
Erythrocyte: Membranes, human, separation of neutral glycosphingolipids of 1020
Ethanol: Feeding in rats, effect of on lung lipid changes 680
Ethinyl estradiol: Treatment, effect of on lymph apolipoproteins in the rat 610
24-Ethylcholesta-(E)-5,24(28)-dien-3β-ol: *see* **Fucosterol**
24-Ethylcholesta-(Z)-5,24(28)-dien-3β-ol: *see* **Isofucosterol**
***Eubacterium* species V.P.I. 12708:** 7α-Dehydroxylation of cholic and chenodeoxycholic acid by 891

F

Fat: Digestion, absorption, and transport in the suckling rat 668, 675
Fat absorption: Factors affecting lipid secretory phase, by golden hamster intestine, in vitro 147
Fat cells: Human, role of GTP in epinephrine stimulation of adenylate cyclase 113
Fatty acids
Isomers from dietary hydrogenated oils, in tissue lipids 955
Long chain, hepatic uptake, sex differences 431
Synthesis in adipocytes, role of in control of insulin-stimulated glucose utilization 753
Fatty acid composition
Of *C. reinhardtii* 137$^+$ glycolipids 1119
Of *C. reinhardtii* 137$^+$ phospholipids 1126
Of lipids of rat milk 668
Of lymph, blood, liver, and gastrointestinal lipids of suckling rats 668
Fatty liver: In dietary-induced hypercholesterolemic, hypothyroid rats 971
Fecal flora: Metabolism of 16α-hydroxyprogesterone by 95
FFA: *see* **Free fatty acids**
Fibroblasts
Cultured, accumulation of polyunsaturated fatty acids in lipids of 57
Cultured human and rat skin, metabolism of lipoproteins by 37
Cultured mouse (3T12 cells) metabolism of 5,6-epoxyretinol by 1069
Interaction with LDL reconstituted with a fluorescent cholesterol analog 687
Fishes, teleostean: Lipid absorption in 81
Florida land crab: Cholesterol and plant sterols in 961
Fluorescamine: In determination of lysophosphatidylethanolamine 882
Fluorescence probe: Investigations of VLDL from the isolated perfused rat liver 838
Fluorescent steryl ester: Use of in studies of cellular interaction with LDL 687
Free fatty acids
Assay by GLC 1
Patterns, in children and young adults, in relation to age and sex 1
Plasma, determination by capillary GLC 852
Plasma, determination of by a sensitive micromethod 377
Release from bone marrow adipose tissue, effect of catecholamines 1271
Free radical label: In study of super-slow molecular dynamics of lipid systems 131
Fucosterol: Dehydrogenation by *Tetrahymena pyriformis* 770

G

Galactose oxidase: Use of in lipid labeling 536
Gallstones: Cholesterol, dissolution in bile by chenodeoxycholate and their conjugates 254
Gangliosides: Specific ^{3}H-labeling at the 3-position of sphingosines 1286
GLC: *see* **Chromatography, gas–liquid**
Glucose
Metabolism in pig adipose tissue 72
Oxidation, in swine adipose tissue slices and adipocytes 1053
Utilization, insulin-stimulated, control in rat adipocytes 753
Glycerokinase: In bioluminescent assay of glycerol release from human adipocytes 1142
Glycerol: Release from human fat cells, bioluminescent assay of 1142
***sn*-Glycero-1-phosphocholine**
An intermediate in the preparation of 1-*sn*-phosphatidylcholines 879
Synthesis of 879
Glycerophosphocholine: Acylation catalyzed by trifluoroacetic anhydride 879
Glycolipids
Cellular and thylakoid-membrane of *Chlamydomonas reinhardtii* 137$^+$ 1119
Neutral, in human myeloid leukemias, chemical characterization of 1079
Neutral, TLC of 1079

Glycosphingolipids: Neutral, separation of, by HPLC 1020
GTP: Role of, in epinephrine stimulation of fat cell adenylate cyclase 113

H

Haemulcholic acid: Unique bile acid from fish bile 1181
Halosterol: Dehydrogenation by *Tetrahymena pyriformis* 770
HDL: *see* **High density lipoproteins**
Hemolymph
Of cockroach, diacylglycerol-carrying lipoprotein 7
Of locusts and insects, diacylglycerol-carrying lipoprotein 1042
Hepatic triglyceride lipase: *see* **Triglyceride lipase, hepatic**
Hepatocytes: Rabbit, interaction with cholesterol and apoproteins of LDL and HDL 1214
Hepatopancreas: Florida land crab, cholesterol and plant sterols in 961
High density lipoprotein
Cholesterol and apoproteins, interaction with isolated rabbit hepatocytes 1214
Cholesterol quantification in turbid heparin-Mn^{2+} supernates 1015
Cholesterol, effect of diet on concentration, in African green monkeys 278
Cholesterol, relationship to LCAT mass and cholesterol esterification rate 1206
HDL_2, preparative isotachophoresis 998
HDL_3, preparative isotachophoresis 998
Infusion of, in Tangier patients 217
Metabolism of, in Tangier disease 217
Negative correlation with small-size LDL 236
Rat, role in cholesterol homeostasis in vivo 37
Rat serum, apolipoproteins of 138
Subclasses, isolation and characterization 359
Subfractionation by ion exchange chromatography 1102
Subfractions, interaction with LCAT 1102
Subfractions, isolation by heparin-Sepharose affinity chromatography 1198
Subfractions, role of in cholesteryl ester transfer 1198
Transfer of cholesteryl ester from phospholipid vesicles to 944
Transfer of surface constituents to, from VLDL 443
HMG-CoA reductase: *see* **3-Hydroxy-3-methylglutaryl**
HPLC: *see* **Chromatography, high performance liquid**
H-TGL: *see* **Triglyceride lipase, hepatic**
Hydrocarbons
In diapausing pupae of the tobacco hornworm 103
In insect DGLP 1042
Hydrogenated oils: Dietary, fatty acid isomers in human tissue lipids 955
Hydrophobic interaction: Of phosphatidylcholine molecular species 697
7α-Hydroxy-4-cholestene-3-one: Oxidation of side chain, in CTX 632
7α-Hydroxycholesterol: Measurement of by GLC–MS, in assay of 7α-hydroxylase 720
(−) Hydroxycitrate: Decrease of insulin-stimulated fatty acid synthesis by, in rat adipocytes 753
26-Hydroxylase: Mitochondrial, hepatic, lack of in CTX 191
7α-Hydroxylase, cholesterol
Assay of 570
Human liver, partial purification and constitution into phospholipid-cholesterol vesicles 872
Measurement of activity with selected ion monitoring 720
Rat liver microsomal, regulation of 570, 580
Rat liver microsomal, reversible inactivation by ATP, Mg^{2+}, and a cytosolic activator 580
In rat liver microsomes, measurement of 532
Hydroxylation
Of bile acids by molds 1225
Of bile acid precursors in CTX 632
Side chain, of C_{27}-steroids and vitamin D_3 by a cytochrome P-450 enzyme system from mitochondria 1254
3-Hydroxy-3-methylglutaryl CoA
Effect on cholesterol 7α-hydroxylase activity 570
Isolation and purification by ion exchange chromatography 184
3-Hydroxy-3-methylglutaryl CoA reductase
Activity, in cultured fibroblasts, regulation by lipoproteins 37
Activity, rabbit intestine, influence of dietary cholesterol and lipid 47
Activity in swine liver and ileum, circadian variation 811
Canine intestinal, in vivo regulation 1111
Relation to cholesterol gallstone disease and treatment with bile acids 410
16α-Hydroxyprogesterone: Dehydroxylation by fecal flora of man and rat 95
3α-Hydroxysteroid dehydrogenase
In determination of liver bile acids 1025
Possible contamination with malate dehydrogenase activity 1025
7α-Hydroxysteroid dehydrogenase: Activity in intestinal microflora 1060
7β-Hydroxysteroid dehydrogenase: Activity in intestinal microflora 1060
Hypercholesterolemia
Dietary-induced, chylomicron metabolism in dogs 598
Rats, nascent lipoproteins in 971
Hyperlipidemia: Production of bile acids 620
Hyperthyroidism
In man, cholesterol metabolism 323
In man, metabolism of plasma triglycerides 307
Hypocholesterolemia: Drug-induced, and hormonal stimulation, effect on sterol metabolism in a Leydig cell tumor 1247
Hypothyroidism
In man, cholesterol metabolism 323
In man, metabolism of plasma triglycerides 307
In rats, effect of cholesterol feeding on apoE and apoB 297
In rats, effect on plasma lipoproteins and apolipoproteins 287

I

Insects: DGLP in hemolymph of 1042
Insulin sensitivity: In swine adipose tissue slices and adipocytes 1053
Intestinal flora: Human, in vitro transformation of

chenodeoxycholic and ursodeoxycholic acids by 735
Intestine
Lipoproteins, metabolism of (review) 1153
Rabbit, HMG CoA reductase activity in 47
Isoelectric focusing
Of apoVLDL and apoLDL from hypercholesterolemic rat serum 971
Quantitation of apoC-III and subspecies by 800
Isofucosterol: Dehydrogenation by *Tetrahymena pyriformis* 770
Isohalosterol: Dehydrogenation by *Tetrahymena pyriformis* 770
2,3-O-Isopropylidene-*sn*-glycerol: In synthesis of *sn*-glycero-1-phosphocholine 879
Isoproterenol: Effect of on release of FFA from bone marrow adipose tissue 1271
Isotachophoresis: Preparative, of human HDL_2 and HDL_3 998

J

Jejunal mucosa: Rat, demonstration of a mucosal esterase that hydrolyzes tocopheryl esters 829

K

7-Keto-lithocholic acid: Formation in vitro, by human intestinal flora 735
Kinetics
Of cholesterol gallstone dissolution in bile 254
Of hydrolysis of rat chylomicron acylglycerols by LPL 506
Of whole body cholesterol turnover in humans 1174

L

Lamellar body material: From rat lung, isolation and characterization 1277
Lanosterol: Synthesis of 32-oxygenated derivatives of 24,25-dihydrolanosterol from 859
LCAT: *see* **Lecithin:cholesterol acyltransferase**
LDL: *see* **Low density lipoproteins**
Lecithin: Suppression of cholesterol absorption by 744
Lecithin:cholesterol acytransferase
Interaction with subfractions of HDL 1102
Mass, relationship to LCAT activity and cholesterol esterification rate 1206
Leukemia
Acute myeloblastic, neutral glycolipids in 1079
Chronic myelocytic, neutral glycolipids in 1079
Leydig cell tumor: Cholesterol metabolism and steroid biosynthesis in 1247
Lipase, lingual: Hydrolysis of triacylglycerols by 675
Lipid absorption: In teleostean fishes 81
Lipid-cholesterol vesicles: With cholesterol 7α-hydroxylase, conversion of cholesterol to 7α-hydroxycholesterol 872
Lipid composition
Of axon plasma membranes from different animals 208
Of Balb/c3T3, SV3T3, and SV3T3 Rev cells 590
Of cultured fibroblasts and smooth muscle cells, effect of polyunsaturated fatty acids 57
Of diacylglycerol-carrying lipoprotein of American cockroach 7
Of fractions of human brain 208
Of lymph, blood, and liver of suckling rats 668
Lipid peroxidation
NADPH-dependent, in rat liver microsomes 905
In tissue cultures, effect of polyunsaturated fatty acids and antioxidants 763
Lipid topogenesis (review) 391
Lipids: In archaeological samples, analysis by HPLC 778
Lipid transport
In hemolymph of the American cockroach 7
In insects 1042
Lipogenesis
In pig adipose tissue, effect of cell size and animal age 72
In swine adipose tissue slices and adipocytes 1053
Lipolysis
In epinephrine-stimulated adipocytes 4879
Gastric, of triacylglycerols in the suckling rat 675
In isolated rat adipocytes, epinephrine-stimulated 934
Of VLDL in vitro, fate of apoC-II, apoC-III, and apoE 641
Of VLDL in vitro, fluorescent method for monitoring 382
Lipoprotein lipase
Activation by apoC-II 921
Activity, in cultured preadipocytes 245
Bovine milk, hydrolysis of chylomicron acylglycerols by 506
Hydrolysis of guinea pig nascent VLDL by 921
Rat heart, immobilized, lipolysis of VLDL by 641
Role of, in generation of LDL and HDL 443
Lipoproteins
Homologous and heterologous, metabolism by cultured rat and human skin fibroblasts 37
Nascent, serum and hepatic, in normal and hypercholesterolemic rats 971
Rat serum, after anti-rat H-TGL injection 437
Lipoproteins, intestinal: Metabolism (review) 1153
Lipoproteins, plasma
Changes resulting from immunologically blocked lipolysis 443, 437
High resolution cholesterol profiles 1003
Metabolism in hypothyroid rats 287, 297
Separation by single vertical spin ultracentrifugation 1003
Lipoproteins, serum
Characterization of classes separated by density gradient ultracentrifugation 339
Human, isolation of major classes by density gradient ultracentrifugation 339
Liposomes: Structure, above and below transition temperature 131
Lithocholic acid: Formation in vitro, by human intestinal flora 735
Liver disease: Platelet lipid composition and platelet aggregation 423
Locust: DGLP in hemolymph of 1042
Low density lipoprotein
Binding to cultured fibroblasts 37
Cholesterol and apoproteins, interaction with isolated rabbit hepatocytes 1214
Direct metabolic product of VLDL, in the rooster 443
Heterogeneity of in normal human subjects 236
Metabolism by human monocyte-macrophages 63

Receptor on monocyte-macrophages, regulation of 1131
Reconstituted with a fluorescent cholesterol analog 687
Subfractions, chemical composition of 236
LPL: *see* **Lipoprotein lipase**
Lung
Lipid changes in, alcohol-induced 680
Rat, isolation and characterization of lamellar body material 1277
Lysophosphatidylethanolamine: Quantification in the nanomole range 882
Lysosomes: Hepatocyte, role in bile flow and biliary lipid secretion 229

M

***Macaca fascicularis*:** Hypercholesterolemic, ACAT activity in 659
Malondialdehyde: -Altered LDL, metabolism by human monocyte-macrophages 63
***Manduca sexta* (L.):** Diapausing pupae of, hydrocarbons in 103
Mass spectrometry
Chemical ionization, of bile acid methyl ester acetates 166
Chemical ionization, use of ammonia gas 166
Of fecal flora metabolites of 16α-hydroxyprogesterone 95
And GLC of chenodeoxycholate metabolites from human intestinal *Clostridia* 652
Of hydrocarbons of tobacco hornworm pupae 103
Of hydroxylated metabolites of bile acids 1225
Isotope dilution, assay of intermediates in bile acid biosynthesis by 191
Membranes
Lipid movement in 391
Protein and lipid asymmetry of 391
Metabolic heterogeneity: Of apoB in the rat 519
24α-Methylcholest-5-en-3β-ol: *see* **Campesterol**
24-Methylcholest-5,24(28)-3β-ol: *see* **24-Methylenecholesterol**
24-Methylcholesta-5,24(25)-dien-3β-ol: *see* **24-Methyldesmosterol**
24α-Methylcholesta-5,7-dien-3β-ol: *see* **7-Dehydrocampesterol**
24-Methylcholesta-5,7,22-*trans*,24(25)-tetraen-3β-ol: *see* **7,22-Bisdehydrodesmosterol**
24α-Methylcholesta-5,7,22-*trans*-trien-3β-ol: *see* **24-Epiergosterol**
24-Methyldesmosterol: Dehydrogenation by *Tetrahymena pyriformis* 770
24-Methylenecholesterol: Dehydrogenation by *Tetrahymena pyriformis* 770
Mevalonate
Metabolism in rats 990
Urinary clearance and metabolism by the perfused rat kidney 916
Micellar solutions: Of cholesteryl oleate and tocopheryl acetate, in assay of pancreatic esterase activity 177
Microsomes
Cynomolgus monkey liver, ACAT activity in 659
Rat liver, measurement of cholesterol 7α-hydroxylase 532
Rat liver, NADPH-dependent lipid peroxidation in 905
Mitochondria
Human liver, cytochrome P-450 enzyme system in 1254
Rat liver, effect of Ca^{2+} plus N-ethylmaleimide on permeability and lysophosphatidylethanolamine content 882
Molds: Synthesis of 1β- and 15β-hydroxylated bile acids by 1225
Molecular dynamics: Of DMPC in liposomes 131
Mongolian gerbil: Hepatic sterol synthesis in 792
Monoacylglycerol lipase: Spectrophotometric assay with thioester substrates 496
Monocyte-macrophages: Metabolism on native and malondialdehyde-altered LDL by 63
MS: *see* **Mass spectrometry**
Mucosal esterase: In endoplasmic reticulum of the enterocyte 829
β-Muricholic acid: Synthesis in the rat, acceleration by bile duct ligation 201
Myelin: Human brain, lipid composition of 208

N

Neomycin: Immobilized, column chromatography of acidic phospholipids 1296
Neutral steroids
Fecal, origin in rats 485
In human and rat feces, identification of by TLC and GLC 474
Nicotinic acid: Mechanism of hypolipidemic action in man 24
Nonesterified fatty acid: Concentration and composition, in children and young adults 1
24-Norcholesterol: *see* **Halosterol**
26 (or 27)-Norcholesterol: Dehydrogenation by *Tetrahymena pyriformis* 770
Nuclear magnetic resonance
Carbon-13, studies of 9α-fluoro- and 9α-OH-$\Delta^{8(14)}$-15-ketosterols by 1188
Spectral analyses of zymosterol 171
Spectroscopy, of hydroxylated metabolites of bile acids 1225

O

***trans*-Octadecenoic acid:** From dietary hydrogenated oils, in human tissue lipids 955
Oleic acid: Hepatic uptake, sex differences in 431
Ostreasterol: *see* **24-Methylenecholesterol**

P

Pancreatic esterase
Activity, assay using micellar solutions of cholesteryl oleate and tocopheryl acetate 177
Hydrolysis of tocopheryl esters in the rat 829
Pancreatic juice: Diversion, effect on cholesterol absorption and esterification in the rat 157
(20*R*)-*n*-Pentylpregn-5-en-3β-ol: *see* **26(or 27)-Norcholesterol**
Perfused rat kidney: Clearance and metabolism of mevalonate by 916
Perfused rat liver: Single-pass, uptake of long chain fatty acids 431
Perfusion, heart: Lipolysis of VLDL 641

Peroxidase: Use of in measurement of choline-containing phospholipids in bile 373
Phase transition temperatures: Of cholesterol crystals 785
Phosphatidylcholine
Biliary, molecular species in gallstone patients 404
In lungs from ethanol-fed rats 680
Molecular species, reversed phase HPLC of 697
Short acyl chain, synthesis of 877
Phospholipase A: Spectrophotometric assay with thioester substrates 496
Phospholipase D: Use of in measurement of choline-containing phospholipids in bile 373
Phospholipid exchange proteins: Lipid modification of membranes of 905
Phospholipids
Acidic, column chromatography of on immobilized neomycin 1296
Of Balb/c3T3, SV3T3, and SV3T3 Rev cells 590
Cellular and thylakoid-membrane of *Chlamydomonas reinhardtii* 137^{+} 1126
Choline-containing, in bile, enzymatic measurement of 373
Fluorescent, method for monitoring lipolysis of VLDL 382
Of human brain fractions 208
In lamellar body material from rat lung 1277
In urine of the normal human male 122
Phospholipid vesicles: Transfer of cholesteryl ester from, to HDL 944
Plant sterols: Biosynthesis, absorption, and origin in the Florida land crab 961
Plasma membrane
Adipocytes, changes in response to nutrition 1094
Adipocytes, effect of diet in protein and lipid composition 1094
Adipocytes, estimation of quantity using diazotized diiodosulfanilic acid 1094
Platelet aggregation: In human liver disease 423
Platelet lipids: Composition in human liver disease 423
Polyunsaturated fatty acids
Accumulation in lipids of cultured fibroblasts and smooth muscle cells 57
Effect of, on lipid peroxidation in tissue cultures 763
Metabolism in cultured cells 57
Preadipocytes: In culture, accumulation of triglyceride from VLDL 245
Pulmonary surfactant: In lungs from ethanol-fed rats 680

R

Radioimmunoassay
Of apoC-III and its subspecies 800
Of vitamin A 869
Rainbow trout: Ultrastructure of intestinal epithelial cells 81
Receptor
α-Adrenergic, role in regulation of lipolysis by human adipocytes 1265
LDL, on human monocyte-macrophages, regulation of activity 1131
Scavenger, on human monocyte-macrophages, regulation of activity 1131
Regenerating liver: Role of retinoid-binding proteins 899
Retinoic acid: Conjugated to human serum albumin, in radioimmunoassay of Vitamin A 869
Retinoid-binding proteins
From regenerating liver, characterization of 899
Role in cell proliferation and differentiation 899
Retinoid derivatives: Reactivity with vitamin A antiserum 869
Retinoids: High pressure liquid chromatography of 1069
Retinol: And phosphoryl esters, chemical and biological 1069
Rhesus monkeys: Regulation of cholesterol biosynthesis in 16

S

Saturated fat: Dietary, reduction of NADPH-dependent lipid peroxidation in liver microsomes by 905
Sex differences: In hepatic uptake of long chain fatty acids 431
Sitosterol: Dealkylation to cholesterol, in the Florida land crab 961
Smooth muscle cells: Cultured, accumulation of polyunsaturated fatty acids in lipids of 57
Spectrophotometric assay: Of phospholipase A, and monoacylglycerol lipase, with thioester substrates 496
Sphingomyelin: And ceramide, separation of molecular species by HPLC 714
Sphingosines: In gangliosides, specific ^{3}H-labeling of 1286
Steroids
Biosynthesis in a functional Leydig cell tumor 1247
C_{27}, Side chain hydroxylation by a human liver mitochondrial cytochrome P-450 enzyme system 1254
Sterol(s)
Biosynthesis, inhibitors of 1188
Biosynthesis in the rat, stimulation by hypercholesterolemia 990
Chemical synthesis of 3β-hydroxy-5α-cholest-7-ene-9α-carbonitrile 370
Digitonin-precipitable, rates of synthesis and uptake in the major organs of the rat in vivo 551
Effect on canine mucosal HMG CoA reductase activity 1111
Synthesis, hepatic, in the Mongolian gerbil 792
Synthesis of 32-oxygenated derivatives of 24,25-dihydrolanosterol 859
Sterol balance: Effect of nicotinic acid 24
Suckling rat: Fat digestion, absorption, and transport 668, 675
Sulfated bile acids: Serum, separation from non-sulfated bile acids 705

T

Tangier disease: Metabolism of HDL in 217
Tetrahymena pyriformis: Dehydrogenation of sterols at C-7 and C-22 by 770
Thermal behavior: Of VLDL lipid components 838
Thioester analogs: Of phosphatidylcholine and phosphatidylethanolamine 496
Tissue lipids: Human, isomers of dietary hydrogenated oils in 955
Tobacco hornworm: Diapausing pupae of, hydrocarbons in 103

Tocopherol: Absorption of micellar solutions, in the rat 829
Tocopheryl acetate
Absorption of micellar solutions, in the rat 829
Micellar solution, use of in pancreatic esterase activity measurement 177
Transport: Of fat, in the suckling rat 668, 675
Triacylglycerol
Analysis, stereospecific 675
Hydrolysis of, in the suckling rat 675
Trifluoroacetic anhydride: Use of in acylation of glycerophosphocholine 877
Triglyceride
Absorption by the rainbow trout 81
Accumulation in cultured preadipocytes, from VLDL 245
Metabolism in man, effect of nicotinic acid 24
In nascent VLDL, hydrolysis by lipoprotein lipase 921
Triglyceride lipase, hepatic
Function of, in lipoprotein metabolism 437
Inhibition by anti-rat H-TGL, in vivo, changes of lipid concentration 437
Purification by affinity chromatography 437
Triglyceride, plasma
Metabolism in hypothyroidism and hyperthyroidism in man 307
Relationship with concentration of apoC-III and subspecies in plasma 800
Triglyceride-rich lipoproteins: Metabolic heterogeneity in the rat 519
Trihydroxycholanoic acids: Synthesis of 1181
Triparanol: Feeding, effect of in cholesterol-fed rhesus monkeys 16
Tritium labeling: Of 3-position of sphingosines in gangliosides 1286
Triton WR 1339: Production of hypolipemia by, in rats 990
Turnover
Of bile acids, measurement 528
Of whole body cholesterol in humans 1174

U

Ultracentrifugation, analytical: Of LDL from normal human subjects 236
Ultracentrifugation, density gradient
Of crude lung homogenates 1277
Isolation of major lipoprotein classes from human serum 339
Of LDL from normal human subjects 236
Ultracentrifugation, vertical spin: Separation of plasma lipoproteins 1003
Ultracentrifugation, zonal: Of VLDL, LDL, AND HDL 443
Ultrafiltration: Of turbid heparin-Mn^{2+} supernates, for HDL analysis 1015
Ultrastructure: Of rainbow trout intestinal epithelial cells, during lipid absorption 81
Urinary clearance: Of mevalonate by the perfused rat kidney 916
Urine: Cholesterol, source of in the normal human male 122
Ursocholic acid: Formation from cholic acid by *C. absonum* 458
Ursodeoxycholic acid
Conjugates, separation from other bile acid conjugates by TLC 712
Conversion to chenodeoxycholic acid by intestinal 1060
Effect on micellar solubilization and intestinal absorption of cholesterol 467
Epimerization of chenodeoxycholic to, by human intestinal *Clostridia* 652
Formation from chenodeoxycholic acid by *C. absonum* 458
And glycine and taurine conjugates, dissolution of cholesterol gallstones by 254
In vitro transformation by human intestinal flora 735

V

Very low density lipoprotein
Differential scanning calorimetry and fluorescence probe investigations 838
Effect of interior core lipids on properties of the surface monolayer 838
Fluorescent phospholipid method for monitoring lipolysis of 382
In hepatic Golgi and secretory vesicles 971
Intestinal (review) 1153
Lipolysis in vitro, fate of apoC-II, apoC-III, and apoE 641
Metabolism in hypothyroid rats 287
Nascent, hydrolysis by lipoprotein lipase 921
Particles, in intestinal epithelial cells of the rainbow trout 81
Rat lymph, apolipoproteins of 138
Transfer of cholesteryl ester to, from HDL 1198
Transfer of surface components to HDL 443
Triglyceride, effect of nicotinic acid in man 24
Triglyceride, transport in hypo- and hyperthyroidism 307
Utilization of triglyceride by cultured preadipocytes 245
Vitamin A
Antibodies, reactivity with vitamin A derivatives 869
Deficiency in rats, retinoid-binding proteins in liver 899
Radioimmunoassay 869
Vitamin D_3: Side chain hydroxylation by a human liver mitochondrial cytochrome P-450 enzyme system 1254
VLDL: *see* **Very low density lipoproteins**

W

[^{3}H]Water: Use of in measurement of hepatic sterol synthesis 792

X

Xanthoma tissues: Experimental, cholesterol synthesis and esterification in 1033
X-Ray diffraction: Of cholesterol 785

Y

Yeast: Isolation of zymosterol 171

Z

Zymosterol
Isolation from yeast 171
Spectral properties of 171

NEW METHODS INDEX

Volume 22, Numbers 1–8

Compiled by H. A. I. Newman

The numbers in this index refer to entry numbers in the New Methods listings, which are found on the pages of Volume 22 given below.

Nos. 1–26, pp. 188–189
Nos. 27–85, pp. 387–389
Nos. 86–128, pp. 544–546
Nos. 129–164, pp. 730–731
Nos. 165–228, pp. 887–889
Nos. 229–272, pp. 1028–1030
Nos. 273–320, pp. 1148–1150
Nos. 321–381, pp. 1301–1303

ENTRY NO.

Acyl-CoA carboxylase: Isolation from liver 330
Acetylcholine receptors: Muscarinic, solubilization from mammalian brain 359
Aflatoxin B_1 antibody: Enzyme-linked microassay 129
Aflatoxins
B_1, enzyme-linked immunosorbent microassay 129
HPLC of human tissue 322
identity and confirmation in dairy products and animal tissues 166
HPLC from pistachio nuts 229
HPLC of 165
HPLC of soy sauce and fermented soybean paste 231
M_1, confirmation of identity in dairy products and animal tissues 166
radioimmunoassay compared with enzyme-linked immunosorbent assay 230
synthesis of 321
Apolipoproteins
A-I, electro- and radioimmunoassay of HDL 353
laser immunonephelometry quantitation 355
laser nephelometric immunoassay 86
radial immunodiffusion-storage effects 110
A-II, electro- and radioimmunoassay of HDL 353
radial immunodiffusion-storage effects 110
radioimmunoassay for characterization and measurement 112
A-II and C-I mixed interaction evaluated by equilibrium sedimentation 356
Amyloid-related from human HDL 130
B, electroimmunoassay 354
separation by preparative SDS-gel electrophoresis 20
characterized from human serum LDL in normal-dodecyl octaethyleneglycol by electron microscopy 260
C-I, electroimmunoassay 254
C-II, electroimmunoassay 254
E, radioimmunoassay 252
radioimmunoassay as affected by apoE_3 deficiency 255

ENTRY NO.

HDL, immunoelectromicroscopy of their binding to fibroblasts 197
Ion-paired, reversed-phase HPLC of human VLDL 300
New chylomicron-associated 299
S-peptides as new apoproteins of human HDL which are induced by glucose infusion 256
SDS-gel filtration chromatography of 301
Arachidonic acid
Metabolites from human and rabbit incubations, HPLC of 120
Oxygenated metabolites, rapid extraction with octadecylsilyl silica 160
Bile acid intermediates: Assay by isotope dilution–MS 324
Bile acids
5-Alpha conjugates, synthesis and properties of 29
Chemical ionization–MS of bile acid methyl ester acetates in ammonia gas 273
Chromorod separation of 1
Computerized GLC–MS for identification 124
Conjugated, TLC of 323
Dihydroxy, TLC separation from trihydroxy 325
GLC with nematic liquid crystal 3
Hepatic extraction measurement in subjects with and without liver disease 232
HPLC with alternating voltage polarographic detection for 274
HPLC (reversed phase) of 89
biliary 90
Lithocholic, purification 131
Monosulfated, HPLC of 2
Non-sulfated, GLC of 27
Premethylated, GLC of 87
synthesis and characterization 87
Pool size and synthesis rate of (in humans) 28
Reversed phase HPLC mobility related to structure of 326
TLC 323
Trihydroxy, TLC separation from dihydroxy 325

Turnover measurement and pool size with double label, single intubation 276
Unsaturated 5-, analysis and structure determination 88
Bile alcohols: TLC 323
Carbohydrates
Mass detector analysis 348
Separation by a radially compressed HPLC column modified with tetraethylenepentamine 347
Cell surface: Labeling of lymphocyte antigens with hexanoyl-diiodo-*N*-(4-azido-2-nitrophenyl)tyramine 360
Ceramide-(trimethyl) aminoethyl phosphonate: Synthesis of 364
Cerebrosides: Cerasine, small angle X-ray diffraction of 49
5-α-Cholest-7-en-3β, 14α-diol: Synthesis chemically 84
5β-Cholestane-3α,7α,26-triol: 25*R*- and 25*S*-, ^{13}C NMR differentiation 83
Cholestanone: HPLC of rat adrenal 376
Cholesterol
22(*S*), 23(*S*)-Methylene-, synthesized by alkylation of 22-dehydrocholesterol 161
Absorption determined by chemical and isotopic measurement 162
Asymmetry through rapid kinetics of filipin-cholesterol association 314
Determined in electrophoretically separated lipoproteins 18
Epoxide, determination 91
Esterified, kinetic enzymic method with ABTS as chromogen 127
Extraction from erythrocyte ghosts, microsomes and blood plasma with a specific sorbent and phospholipid, liposomes 374
Free, kinetic enzymic method with ABTS as chromogen 127
GLC 163
High-density lipoprotein, enzymatic reagent with increased sensitivity 226
HPLC 113
sensitive assay 349
HPLC from foods 227
Isolated from cholesterol esters by HPLC 375
Lipoprotein, HPLC of 258
Lipoprotein, photometrically determined after agarose electrophoresis and compared to ultracentrifugation 253
Membrane electrode (microbial) for determination of 30
Methodology for human studies 128
Oxidase determination as cholest-4-en-3-one with iso-octane extraction 377
Quality control with elevated concentrations prepared from animal lipid sources 228
Sensitive reaction for 373
Serum total, MS with heptadeuterated internal standard 4
Cholesterol balance studies: Error with African green monkeys on a cholesterol-free diet 126
Cholesterol ester hydrolase: Micro-radiometric assay for in rat luteal tissue 5
Cholesteryl esters: Separated from cholesterol by HPLC 375
Chromatography
Boxcar, for increased analysis rate with large column plate numbers 278
Detection of small shape variations between two peaks 277
Preparative liquid, microprocessor-controlled for optimization 327
Cloprostenol: Synthesis of 368
DDT: Estimated in milk 195
7-Dehydrocholesteryl derivatives: Synthesis of 177
1,2-Diacylbenzylglycerols: Synthesis of 71
1,3-Diacylbenzylglycerols: Synthesis of 71
Diglycerides: Sulphoquinovosyl, synthesis of 141
Dihydrolanosterol: Determined through metastable decompositions 318
1,3-Distearoyl-glycero-2-phosphocholine: Isolated from commercial phosphatidylcholine 73
Eicosa-5*Z*,12*E*,14*Z*-trienoic acid
8*R*,9*R*,11*R*,8*S*,9*R*,11*R*, synthesis of 156
8*S*,9*S*,11*R*-triacetoxy, synthesis of 156
Eicosatetraynoic acid: 5,8,11,14-, GLC of plasma 285
Eicosatrienoic acid: [^3H]-12-L-hydroxy, preparation and radioimmunoassay use 80
Esterases
Neutral, separation from human liver and characterization 237
Pancreatic, cholesteryl oleate and tocopheryl acetate substrates for 316
Fat absorption: Measurement with [^3H]glycerol triether and [^{14}C]glycerol trioleate in man 9
Fats: Autoxidized, GLC–MS 56
Fatty acid cyclooxygenase: Purification and characterization 133
Fatty acid methyl esters
Determination with HPLC–MS (chemical ionization) 46
GLC with capillary columns coated with Silar 10C or Alltech CS-10 and Silica T40 for isomer separation 101
Tetracosa dienoic-, radiolabeled, TLC isolation from rat erythrocyte lipids 99
Tetracosa mono-, radiolabeled, TLC isolation from rat erythrocyte lipids 99
Fatty acids
4-(2-Thiazolylazo)-resorcinol assay of 10
[^3H]-12-L-Hydroxyeicosatetraenoic, preparation and use in radioimmunoassay 80
Cyclopropane, biosynthesis from oleic acid-9, 10-d_2, oleic acid-8,8,11,11-d_4 and L-methionine-methyl-d_3 242
Esterification prior to GLC 245
Furnoid C_{20} from fish, synthesis from rubber plant latex 139
HPLC and detection of picomole quantities by labeling with 9-diazomethylanthracene 100
ω-Hydroxy, general synthesis 337
(ω-1)-Hydroxy, general synthesis 337

ENTRY NO.

GLC from complex mixtures and detection with electron capture 103
Labeled with 9-diazomethylanthracene for fluorescence and ultraviolet detection of picomoles from HPLC 100
Methoxy-bromomercuri-adduct fractionation of 344
Radiolabeling with ^{123}I and ^{131}I 184
Reversed-phase liquid–liquid column chromatography with a complexing stationary phase, tri-*n*-octylphosphine oxide 288
Saturated and unsaturated, synthesis of terminal or penultimate deuterated 345
Trans, GLC with Sp2340 glass capillary columns 287
OV 275-packed steel column separation—a note of caution 346
Volatile, GLC determination from rumen fluid, urine, and blood plasma 140
GLC for identification of anaerobic bacteria 186
GLC from ambient air 185
vaccum distillation–GLC for quantitation 183

Fatty alcohols
Chromatography and spectroscopy of 11
Palladium-catalyzed oxidation of Δ^2, Δ^3, Δ^4-unsaturated 286

Fatty esters: Hydroxystearate isomers, separated from hydroperoxides by HPLC of autoxidized 58

Free fatty acids
Assayed by adding parinaric acid as internal standard 45
Colorimetric assay compared to GLC 339
Enzymatic method for colorimetric determination of 246
Enzymic determination in serum 102
Enzymic determination with colorimetry 104
Long-chain, photometric titration of 338
Sensitive method for plasma 341
TLC-flame ionization determination 60

Fucosterol: Identification in the silkworm 317

Galactocerebrosidase: Spectrophotometric and fluorometric assays of activity for Krabbe's disease diagnosis 233

Galactocerebrosides: Galactose oxidase-sodium borotritide quantitation 192

Ganglioside G_{M2}-*N*-acetyl-β-D-galactosaminidase: Assay for activity in human fibroblasts 328

Gangliosides
Extraction and identification of brain 51
G_{M1}, radioassay of cerebrospinal fluid 48
G_{T1A}, biosynthesis in vitro 52
NeuNG1-lac-cer-hematoside, preparation of horse erythrocyte 106
Novel frog 50

Gas–liquid chromatography: Statistical analysis of peaks 187

β-Glucosidase: Assay comparisons 31

Glycerides: Isomeric, TLC–flame ionization determination 60

Glycerol
3-*O*-(6-deoxy-6-sulpho-α-D-glucopyranosyl)-1,2-di-*O*-hexadecanoyl-L-, synthesis of 141
Continuous-flow analysis of 189

Glycerophosphates: GLC and flame photometric detection as applied to glycerophospholipids 211

Glycerophosphoryl ethanolamine: Separation from taurine on amino acid analyzers 305

Glycosphingolipids
MS–chemical ionization for characterization 105
Oligosaccharides from, HPTLC-autoradiofluorography on cellulose 12

Heptadecatrienoic acid: 12-hydroperoxy-5,8,10-, enzymatic synthesis 81

Hexachlorocyclohexane: Determined in milk 195

High-performance liquid chromatography
Bonded non-polar phase and attached alkyl chain length influence on retention characteristics for reversed phase HPLC 143
Bonded phases for with monochlorosilanes 142
Electrochemical cell for 291

Hydrocarbons
Aromatic, electron-capture detection of 250
high-field proton magnetic resonance spectrometry 194
HPLC from shale oil 54
Chlorinated, headspace GLC of 249
Chlorinated, rapid extraction from biological material with low fat content 146
Cyclic(C_6), separation on microporous silica 145
GLC absorption and solution on glycols 107
GLC as a characterization of Porapak columns 53
GLC–flame ionization in a hydrogen atmosphere 55
Halogenated, GLC–MS computer analysis of volatile 13
Helical, synthesis of 144
HPLC of gasoline 293
MS of cis-trans isomeric bicyclo alkanes 14
N-alkanes C9–C17 analysis in clean air 16
Olefin, HPLC of shale oil 54
Polycyclic aromatic, concentration on carbon black from aqueous samples 108
HPLC and low-temperature fluorometry 292
HPLC from food, water, and smoke 193
laser-excited Shpolskii spectroscopy of 294
negative chemical ionization-charge inversion MS of 251
Polyhalogenated, GLC-negative ion chemical ionization MS 248
Pristane analysis in clean air 16
Saturated, HPLC of shale oil 54

3-hydroxy-3-methylglutaryl-coenzyme A: Ion-exchange chromatographic purification 281

3-hydroxy-3-methylglutaryl-coenzyme A lyase: Purification and characterization 134

Indolyl acetic acid: Synthesis of 98

Isofucosterol: Identification in the silkworm 317

Lanosterol: Determined through metastable decomposition 318

Lauric acid: Tritium labeling 43

Lecithin: Isolated from commercial lecithin 73

Lecithin:cholesterol acyl transferase
Clinical laboratory assay 92
Lipoprotein independent assay for human serum 235
Lysolecithin acylation by 93

Leukotrienes: Synthesis by phenylselenylation of arachidonic acid 367
Lipase
Acid, separation from human liver and characterization 237
Lysosomal acid, purification from human liver 236
Lipases
Monoacyl, thioester substrates and continuous spectrophotometry 280
Oxyelectrode measurements of serum 167
Pancreatic (guinea pig), purification of two with high phospholipase A_1 activity 234
Lipid: Masses quantitated by liquid scintillation counting following charring on TLC plates 59
Lipid clearance coefficient (K_2): Determined by centrifugation and compared to the Gordis test and spectrophotometric measurement 57
Lipids
Chromatography of food 296
Ether, isotopic derivative microdetermination 298
Free radical labeled to study super-slow dynamics 295
Hydroperoxides, thiobarbituric acid assay under anaerobic conditions 182
Microprocedure for 149
Skin, photoacoustic spectroscopy of 297
TLC–flame ionization, response and linearity 196
determination of chloroplast 109
of human platelet 17
Tritium-labeled, preparation by heterogeneous catalytic isotope exchange 147
Lipoprotein lipase: Purification and properties of bovine 34
Lipoprotein lipase activity: Micromethod for, with human adipose tissue and skeletal muscle 6
Lipoproteins
Cholesterol, photometry after agarose electrophoresis 253
enzymatically determined in electrophoretically separated bands 18
HPLC from human serum 258
Density gradient ultracentrifugal procedure for separation of major 351
Density gradient ultracentrifugal technique for separation after prestaining 358
Detection system improvement after single-step density gradient ultracentrifugation 257
High-density, cholesterol by an electrophoretic (cellulose acetate) procedure 200
cholesterol enzymatic determination with increased sensitivity 226
cholesterol quantitation by direct assay of the supernatant 199
cholesterol phospholipids and apolipoprotein A-I comparisons 203
chromatographic method for 21
dextran sulfate-$MgSO_4$ precipitation for quantitation 202
heparin–magnesium chloride–albumin method for cholesterol measurements 150
isolation with polyethylene glycol 6000 198
phosphatidyl choline incorporation 201
polyethylene glycol separation method 148
quality control of 62
quick and simple method 19
sensitive cholesterol assay 349
subfractions-cholesterol by HPLC 113
triglyceride determination in 381
Low-density, bound to human fibroblast receptors detected by fluorescence 111
egg yolk, separated by affinity chromatography 22
Microprocedures for 149
Very low-density, lipolysis monitoring with a fluorescent phospholipid method 357
X, enzymatic determination 259
Lithocholic acid: [7,7-H-2(2)]-, preparation of 275
Low-density lipoprotein receptors
Binding quantification and cholesterol accumulation (human fibroblast) with fluorescence microscopy 66
Bound to lipoproteins in human fibroblasts by fluorescence 111
Electron microscopic localization on cell surfaces 205
Purification and characterization 153
Membrane asymmetry: Methods based on lipid distribution inequality reviewed 206
Membranes
Cholesterol interaction with 1,2-dipalmitoyl-*sn*-glycero-3-phosphocholine by spectroscopy 68
Erythrocyte single cell technique for measurement of potential, conductance and efflux of solutes 114
Model, constructed from diacetylenic fatty acids and phospholipids 65
Plasma, affinity chromatography isolation of human platelet 261
cationic bead isolation 63
isolation from rat kidney cortex 361
one-step method for pigeon erythrocytes 207
radiolabeling and glycoprotein electrophoresis of rat hepatocytes 208
zonal electrophoresis on density gradients to separate for SER 67
Sarcolemmal vesicular, preparation of rat aortic 204
Methyl linoleate: Hydroperoxy-cyclic peroxides and other secondary products, HPLC of 343
Methyl linoleate diperoxides: Formation, isolation and structure determination 340
Monogalactosyldiglyceride: Purification of 247
Myristic acid: Tritium labeling 243
***N*-acetyl-β-D-hexosaminidase:** Fluorometric continuous assay for 33
Octanoic acid: Perfluoro-, determination of, in blood and other biological samples 44
Oligosaccharides: D-gluco-, HPLC underivatized 290
Organic acids: Quantitative recovery by oleate replacement ultrafiltration 342
Palmitic acid
D2, preparation of 241
Tritium labeling 243
Phosphatidylserine: Measured simultaneously with phosphatidylcholine, sphingomyelin, phosphatidylglycerol, phosphatidylinositol, and phosphatidylethanolamine 72

Phosphatidate phosphohydrolase: Assay of mouse liver microsomal 132
Phosphatidic acids: Synthesis of 71
Phosphatidylcholine
1-alkyl, after alkali treatment of chicken egg yolks 115
^{3}H labeled 1,2-distearoyl, preparation of 265
Amniotic fluid determination 216
Autoradiography of 217
Carbamyl analogs, synthesis, interaction with phospholipases and liposome behavior 264
HPLC of 306
Infrared quantitation in the presence of sphingomyelin 266
Measured simultaneously with sphingomyelin, phosphatidylglycerol phosphatidylethanolamine, phosphatidylinositol, and phosphatidylserine 72
Purification by chromatography 25
Saturated, synthesis of 213
Synthesis of isomerically pure saturated mixed-chain 365
TLC (two-dimensional) separation from sphingomyelin 24
TLC for determination of disaturated 219
Tritium thermal activation labeling of 1-palmitoyl-2-(12-azidostearoyl) 307
Phosphatidylethanolamine
1-Alkenyl, characterization in chicken egg yolks after alkali treatment 115
1-Alkyl, characterization in chicken egg yolks after alkali treatment 115
DNS derivatives, HPLC with fluorescence detection 303
Measured simultaneously with phosphatidylcholine, sphingomyelin, phosphatidylglycerol, phosphatidylinositol, and phosphatidylserine 72
Phosphatidylglycerol
Measured simultaneously with phosphatidylcholine, sphingomyelin, phosphatidylinositol, phosphatidylethanolamine, and phosphatidylserine 72
TLC by one- and two-dimensional systems 210
Phosphatidylinositol: Measured simultaneously with phosphatidylcholine, sphingomyelin, phosphatidylglycerol, phosphatidylethanolamine, and phosphatidylserine 72
Phosphatidylserine
^{14}C-Labeled synthesized from cerebral phosphatidic acid 154
DNS, HPLC with fluorescence detection 303
Phospholipase A_1
Activity in two purified lipases from guinea pig pancreas 234
Thioester substrates and continuous spectrophotometry 280
Phospholipase A_2
Isolation from hornet venom and characterization 329
Semisynthesis of arginine-6 bovine 168
Phospholipase D: *p*-Nitrophenylphosphocholine substrate for spectrophotometric assay of 32
Phospholipid bilayers: Quartz surface deposition by a new method 302
Phospholipid precursors: HPLC and direct phosphorus analysis 215
Phospholipids
Alkaline O→N-transacylation for deacylation 304
Carboxy, synthesis of 209
Choline-containing, enzymatic measurement of bile 362
Chromarod separation 214
Colorimetric (dithiocyanatoiron) method for 77
Enzymatic determination of bile and bile-rich duodenal aspirate 74
Fluorescent, synthesis of 366
HPLC of 70
HPLC of egg yolk 212
HPLC purification 263
Radioiodination enzymatically catalyzed by lactoperoxidase 69
TLC of milk without prior extraction 262
Tritium-labeled, from gaseous tritium in solution by catalytic exchange 75
Phosphonolipids: TLC detection of 155
Phosphorus: Inductively-coupled plasma emission spectrometry for determination in waste waters 363
Plasma membranes: Neutrophil (human), purified by nitrogen cavitation and differential centrifugation 23
Platelet: Surface lectin binding sites visualized with lectins adsorbed to gold granules 152
Prostacyclin: Metabolites, radioimmunoassay from plasma and vascular tissue 159
Prostacyclins
(5*Z*)- and (5*E*)-6,9 thia, synthesis of 372
11β-^{3}H, synthesis of 270
Analogues, synthesis of 268
Oxygen-containing, organoselenium-based synthesis 371
Sulfur-containing, organoselenium-based synthesis 370
Prostaglandin D_2: 9-deoxa-9,10-dehydro-, synthesis of 116
Prostaglandins
A_2, butyl analogue synthesis 117
15-fluoro-15-deoxy, synthesis of 309
B_2, 15-fluoro-15-deoxy, synthesis of 309
E, radioimmunoassay 269
E_1, GLC from bovine semen 82
synthesis starting from 11-deoxyprostaglandin E_1 312
E_2, radioimmunoassay in human plasma 369
synthesis of 310
trimethyl determined by GLC (capillary)–MS 157
F, GLC of bovine semen 82
radioimmunoassay 269
radioimmunoassay in bile 79
$F_{2\alpha}$, fluoro, synthesis of 118, 119
15-fluoro-15-deoxy, synthesis of 309
radioimmunoassay 369
synthesis of 310, 368

GLC-chemical ionization after chemospecific deuteration 222
$PGF_{1\alpha}$, 6-oxo-, GLC–MS compared to radioimmunoassay 311
PGI_2, analogues, synthesis of 267
6a-carba, synthesis of 308
Ring modified, synthesis of 220
Separation by centrifugation (horizontal flow-through coil planted system) 78
Series 1 through 11-deoxy E_1, synthesis of 223
Synthesized by conjugate, homoconjugate, and 1,2-additions of acetylene nucleophiles 158
TLC of arachidonate metabolite 313
Proteolipid: HPLC of *Neurospora crassa* microsomal 352
Red cell ghosts: Permeability measured by stop-flow method 151
Red cells: Permeability, measured by stop-flow techniques 151
Retinoic acid
13-*cis*, HPLC of human plasma 94
GLC–MS assay for, in human blood 7
Trans-[11-^{3}H], synthesis of 95
Trans-[11-^{3}H]-5,6-epoxy, synthesis of 95
Retinol
All-*trans*, fluorometric determination 336
HPLC of human plasma 94
Serine: Hantzsch reaction for determination 218
Sitosterol
D-glucoside, HPLC in whisky 225
HPLC determination in whisky 225
Sodium dodecyl sulfate: Sephadex gel partition behavior with high dextran concentrations 15
Sphingoglycolipids: Tritiation by heterogenic catalytic isotope exchange with gaseous tritium 191
Sphingolipids: HPLC of, for study of sphingolipidoses 76
Sphingomyelin
Amniotic fluid measurement 216
Characterization in chicken egg yolks after alkali treatment 115
Infrared quantified in the presence of phosphatidylcholine 266
Measured simultaneously with phosphatidylcholine, phosphatidylinositol, phosphatidylethanolamine, phosphatidylglycerol, and phosphatidylserine 72
TLC (two-dimensional) of, from lecithin 24
Stearic acid
D6, preparation of 241
14 proxyl-, tritiation of 244
Tritium labeling 243
Steroid carboxylic acids: Rapid esterification prior to GLC 245
Steroids: GLC with nematic liquid crystal 3
Sterol derivatives: Polyfunctional, produced by permanganate oxidation of ergosterol and 7-dehydrocholesterol acetate 319
Sterol intermediates: HPLC for cholesterol biosynthesis study 125
Sterols
C-24 epimeric mixtures, determined by 220 MHz NMR spectroscopy 315
Computerized GLC–MS for identification 124
Conformational analysis by X-ray crystallographic analysis 123
Marine, GLC with open tubular columns 121
Quantitation after TLC 122
Sulfatides: Galactose oxidase-sodium borotritide quantitation 192
Thin-layer chromatography
Adsorbent, solvent and sample in 164
Computers for quantitation 380
Cross-scanning application for 378
First and second derivative recording of peaks to assay unresolved compounds 279
Microcomputer-assisted acquisition and reduction of densitometric data 379
Thromboxane
Analog DL-(9,11),(11,12)-dideoxa-(9,11)-epithio-(11,12)-methylene-A_2, synthesis of 224
B_2, synthesis from D-glucose 271
Thromboxane A_2: 15-hydroperoxy, enzymatic synthesis 81
Thromboxanes: Analog DL-(9,11),(11,12)-dideoxa-(9,11)-methylene-(11,12)-epithio-thromboxane A_2 methyl ester, synthesis of 221
α-Tocopherol
GLC of trimethylsilyl derivatives of 39
HPLC of 238
Stereoisomers, chromatography of 284
Stereospecific cyclizations to produce optically active chromans 331
α-Tocopherols: HPLC of 180
Trienoic acid: Conjugated, ^{13}C nuclear magnetic resonance spectroscopy of 61
Triglycerides
Bioluminescent ultramicroassay of serum 190
Determination in HDL 381
Enzymatic method with an immobilized glycerol dehydrogenase nylon-tube reactor 26
Enzymic kit for sensitive assay in lipoproteins 350
GLC (capillary) degradation 188
HPLC (reversed-phase) fractionation of oil 85
Optically clear quality control material with elevated concentrations prepared from animal lipid sources 228
Reversed-phase liquid chromatography at low temperature 289
Sampling and measurement of rat skeletal muscle 47
TLC–flame ionization determination 60
Triton X-100: Turbidometric micromethod for 272
Vitamin A
Analogs, synthesis of 138
Antibodies for radioimmunoassay 181
Automated system for determination of 172
Phosphorylated derivatives, silicic acid chromatography with triethylamine 171
Vitamin D
1,25-Dihydroxy, competitive protein binding assay after purification 175

24,25 Dihydroxy-, competitive protein binding assay of human serum 97
Determination in human plasma 283
HPLC, in vitamin D-containing resin 178
in multivitamin preparations 170
after conversion to isotachysterol derivatives 96
Metabolites, determination in human plasma 283
purification for radioimmunoassay 137
MS of human plasma 43
Nonequilibrium ligand binding assay for 332
Synthetic approaches 176

Vitamin D_2
25-Hydroxy, HPLC separation from 25-hydroxyvitamin D_3 by two-step HPLC 334
Simultaneous determination with 25-hydroxyvitamin D_3 in blood hydroxylated metabolites, HPLC with ternary solvent systems 135

Vitamin D_3
Determination in skin 8
1,25-Dihydroxy-, radioimmunoassay 169
radioimmunoassay (modified) for 173
(24*R*)-24,25-Dihydroxy-, stereoselective synthesis with D-glyceric acid 136
HPLC of 40
HPLC in instant non-fat dried milk 37
24(*R*)-Hydroxy, isolation and identification from vitamin D_3-dosed chicks 240
25-Hydroxy, simultaneous determination with 25-hydroxyvitamin D_2 in blood 8
25-Hydroxy, 26,23 lactone, synthesis of 239
25-Hydroxy-24-oxo-, isolation from incubations with kidney homogenates 179
Hydroxylated metabolites, HPLC with ternary solvent systems 135
C(1) Hydroxylation of 41
Photochemical transformation from C_{19}-functionalized 7-dehydrocholesteryl derivatives 177
Separated from 25-hydroxyvitamin D_2 by two-step HPLC 334
Sephadex LH-20 and normal HPLC of 36
1α,25,26 Trihydroxy-, new metabolite in vivo 335
1,24(*R*)25-Trihydroxy-, radioreceptor assay for 333

Vitamin E
HPLC 38
Quinone, preparation, separation, and characterization of 42

Vitamin K: Rapid determination of deficiency of 35

Vitamin K_2: Isomers, HPLC 174

Vitamin K_3: HPLC and comparison of differential amperometric and ultra-violet detection 282

Zymosterol: Isolation from yeast and spectral properties 320
